

# Data Security & Compliance

Audit-ready reports with BrickStor SP, a data security platform for unstructured data

	<b>HEALTH CARE</b> HIPAA, HITRUST		<b>FEDERAL</b> CMMC, NIST, FedRAMP, RMF
	<b>FINANCIAL</b> SOX/J-SOX, PCI-DSS, FINRA, SEC 17-A		<b>PRIVACY</b> GDPR, CCPA

## Demonstrate Compliance for Audits, Investigations, Legal Holds, and Regulations

- Reduce the amount of stress and time involved with an audit or investigation
- Leverage immutable datasets and legal hold for compliance with audit and investigations
- Leverage immutable snapshots and legal holds
- Demonstrate data is encrypted at rest and when it has been purged or deleted

## Quickly Review and Report on Access and Exposure

- Review and manage user and group access to data shares
- Review who has accessed data, been involved with a project, and when data was accessed
- Detect and remediate data spillage

The screenshot displays the 'Access Control - Share : Permissions' interface. On the left, a sidebar shows storage details for shares like 'rts-demo-bsr-01 (10.1.19.1)' and 'bsr-4a119c27)19.1.12.113'. The main area shows a table of permissions for different paths, including 'VideoProject', 'PhotoStudio', 'LibraryOfCongressArchive', and 'HumanGenomicsArchive'. Each entry lists the identity (e.g., 'Everyone', 'Authenticated Users') and the access level (e.g., 'Full Control', 'Read/Write').
